Our Sleeping and Saloon Cars.

Our railway system is confessedly in advance of any other in the world. Our mileage is as large as that of all Europe combined. Some of the English and continental roads are more solidly built; but for comfort and luxury there is nothing comparable to our sleeping and saloon cars. The private cars in which our railway magnates travel are in point of luxury and costliness far ahead of anything of the kind in the Old World. All our leading railway men habitually use cars superior in elegance to those occupied by monarchs in other parts of the world. William K. Vanderbilt, Robert Garrett, Milton H. Smith, Hugh J. Jewett, and some twenty others of our railway people use cars costing from $20,000 to $30,000 each. There are about 100 very costly cars in use, representing $4,000,000 in cash. Of these some sixty cost $30,000 each.

A Mr. Talbot, editor of a railway newspaper, was presented with a car recently, made by Herr Krupp, the famous gun founder. It is of hard wood, Eastlake finish, with a great deal of æsthetic drapery. The observation room in the end of the car is finished in oak, with French plate glass windows extending from the ceiling to the floor, velvet curtains, Wilton carpets and embossed leather furniture, including divans. The bedroom is in maple and amaranth, and opening from it is the parlor, the most elegant apartment of the car. It is finished in solid mahogany, with rich inlaid panels and carvings of rare and costly woods from the Holy Land. The butler's room, pantry and kitchen are models. It would cost at least $60,000 to duplicate this car. Famous actresses have had private cars very luxurious in their apartments. Mme. Patti had such a one, while Mrs. Langtry actually lived in her car when filling her engagements outside of New York.—Demorest's Monthly.

Fine Flavor of Highland Mutton.

In conversation with a reporter an authority at Fulton market said: "The superior flavor of Welch or Highland mutton is beyond all doubt due to the aromatic plants which abound on the pasturage of those hills, and on which the sheep feed. The hills in Wales are thickly covered with wild thyme, while those in the Highlands are full of lady's mantle and other aromatic herbs which are seldom, if ever, found in other pastures. This is a hint of nature's own giving, which the farmer who goes in for sheep raising or dairying cannot afford to despise in these times of hard competition.

"The aromatic herbs may be no less nutritious than clover or rye grass, but they are just as needful to the formation of a perfect pasturage as the other varieties of plants. For this reason they should be grown in all pasturages. They are easy of cultivation, and will grow in the worst ground, but some are, of course, better suited to certain kinds of soil than others. Parsley, loveage, cumin, coriander, carraway, angelica and wild fennel delight in loamy soils, wild thyme, rock rose, hysop, sage, savory and horehound in dry, poor soils, and peppermint in moist soil.—N. Y. Mail and Express.

Downfall of the "Perfume Craze."

A few months ago, perhaps last fall, there was a perfect "perfume craze." It swept through the fashionable and unfashionable sets of New York society, women especially, and reached some few other cities. The masculine element, everywhere known as "the dudes," took it up also. Not druggists only, but dry goods houses, and every store where women most do congregate, in New York city, were called on hourly by crowds of women, who went from house to house "sampling" perfume, till it became necessary to keep duplicate stock on hand and an experienced set of clerks who could discriminate between bona fide customers, and those who took this method of replenishing their mouchoir case and toilet stand.

The craze took such proportions that the result disgusted the originators of it, and it was suddenly dropped by the elite, until now perfumers tell us there is far less demand than usual for perfumery, and good taste has asserted its sway, delicate, refined and natural odors being mostly in demand.—Cor. Cleveland Leader.

Tenement on the Island of Malta.

Dr. Plimpsoll's account of a tenement barrack on the island of Malta exceeds, indeed, anything ever reported from the land of the Calcutta black hole. "Their cellar dens," say he, "have no fireplace, and therefore no chimneys, and serve singly for a whole family. They have no windows, and some of them have no other aperture of any kind than the door; and when you have reached the bottom of the pit you find the solid rock, wet with slops and foul with the odor of the children. So little air reaches the bottom that the floor never dries, and so little light that you have to light a wax match to avoid falling down in the doorway. In one house there were three subterranean stories of six cellars in each, and in the lowest of all thirty people were living, thirty-nine feet below the surface of the street.—Exchange.

Green Turtles Brought to New York.

From 5,000 to 8,000 green turtles are annually brought to New York, and they sell at an average of fifteen cents per pound, gross weight. They come from Florida, the West Indies and the shores of the Spanish main. Occasionally one is caught as far north as Long Island. They are caught in nets, and also on the beach when they come up to lay their eggs. They do not bite or snap. Their food is green stuffs. In warm weather, with an occasional bath, they will live six weeks without food.—Inter-Ocean.

Sending Out Silkworm Eggs.

The agricultural department at Washington has just sent out large quantities of the eggs of the silk worm by mail to all parts of the country. It has now been satisfactorily demonstrated that the leaf of the osage orange makes as good silk as that of the mulberry, and that the worms will feed upon it and thrive. The department is in receipt of letters from girls in various parts of the country, saying that they have made from $20 to $100 by raising silk in this way.—Scientific American.

Want to Know What It Means.

The London swells have been startled by receiving cards of invitation to Lady Rosebery's receptions minus any envelope or wax seals, and now they want to know if this is an idiosyncrasy of wealth or downright meanness, or a new whim of fashion, which it is expected to adopt in future invitations.—Chicago Journal.

Extended Exploration of Crater Lake.

A party, under direction of officers of the United States geological survey, is about to make an extended exploration of Crater lake in National park. It will be necessary to lower them 1,000 feet down the stony crags in order to reach water.—Chicago Herald.

THE HAND-FED BABY.

A PECULIARLY UNFORTUNATE BEING IN THE SUMMER TIME.

Hot Weather Troubles for the City Infant—Contamination of Cow's Milk. Germs and Taints—Dangers Almost as Greatly to Be Feared.

The hand-fed baby is peculiarly unfortunate in the summer time. The cow's milk, upon which it has to rely for the greater part of its nourishment, may be derived from a swill-fed, city cow, that has no opportunity to breathe the pure air of the country or to secure natural food. Such milk is, at best, poorly calculated to furnish food for a delicate child. If the animal has tuberculosis or other wasting disease her milk is simply poisonous. If the material supplied by the generous milk can has been brought from the green fields of the farms thirty to fifty miles away, it has had to run the gauntlet of a thousand dangers before the city child has a chance to make use of it to sustain its feeble life. The milkmaid may have been too lazy or careless to properly cleanse the receptacle which first receives it; the can that brings it to the depot is, as likely as not, in the same condition as regards cleanliness; on the train it may not be kept properly cooled; at the milk depot dishonest servants may abstract the cream or increase its bulk with water from the nearest well or other source of impurity; while the milkman himself may tamper with it on his rounds in order to increase his own revenue.

But the dangers to which the milk has been exposed before it reaches the family are often small compared with those it encounters in the home—of rich and poor alike. No matter what precautions have been taken by farmer, transportation company and dealers, every particle of city milk has become contaminated with the germs of decomposition before it can be delivered to the consumer. They may be hindered from developing by one of two methods—by boiling or by keeping the milk cold. The former is the only safe one, but it partially unfits it for food. Boiling is effective only for a short time—so long as the surrounding air, laden with new germs of the same kind, has free access to it. Keeping it cold with ice is beyond the financial ability of many; besides, the ice used for this purpose may have been cut from the surface of a stagnant pond and be full of germs of decomposition or of disease. The feeding bottle is in a vast number of instances the unsuspected cause of death. Unless the utmost care is taken with such bottles they are sure to have portions of decomposing milk clinging to them, which speedily set up changes of the same sort when filled with a fresh supply.

DANGERS ALMOST AS GREAT.

Children who have outgrown the feeding bottle are exposed to dangers almost as great in the shape of hot bread, indigestible cakes, pies, meats and stale vegetables. Food of the best quality, originally, is often spoiled by an ignorant cook and rendered practically poisonous, especially for young children. Many a fatal case of "summer complaint" has been traced to green apples, spoiled peaches, raw cucumbers, rotten tomatoes, or some form of pork or veal, such as the elder members of the family have eaten with impunity, if not enjoyment. The heated term, especially if the sleeping quarters are confined and not ventilated, forces the skin to do an unusual amount of work. The effect of excessive sweating, if frequent baths are not taken, is to set up irritation of the surface that results in an eruption, the so-called "prickly heat." Irritation of the skin interferes with sleep and increases the general loss of strength besides, by what the "common man" calls "sympathy" (the scientific people call it "reflex action," which is equally lucid), the mucuous membrane which lines the entire digestive apparatus becomes irritated also. This is a common enough cause of "summer complaint."

It is easily to be seen, therefore, that the great underlying cause of all these troubles, for they are at bottom one, is the excessive heat of our summers. The bad hygiene depends upon this for its fatal consequences. The European writers are mostly of the opinion that cholera infantum, which is the most rapidly fatal of these affections, is an Americanism. They may be right to a certain extent, for our own conditions of climate are unknown among the countries of northern and central Europe.—Cor. St. Louis Globe-Democrat.

The Insects of Southern California.

Southern California is full of insects and reptiles. There are thirty-five varieties of ants. Occasionally a tree is so full of them that if, as Mr. Van Dyke naively says, a mother grizzly bereft of her cubs were raging in one's immediate rear it would be a serious question whether to climb the tree or the bear. There are about a dozen kinds of wasps, each with a business end, the largest being the tarantula wasp, which is nearly two inches long. The tarantula proper is found only in a few places in the low lands. There are two kinds—the black and the brown—and the largest are nearly two and a half inches long by one and one-half wide, with long, thick, curved legs, and the body hung low so that the curved part of the leg is above the back. They look like a huge spider, and their bite is said to be fatal, though Mr. Van Dyke never heard of anybody being bitten by them.

Of beetles, butterflies, bugs and fleas, there is apparently no end. Centipedes and scorpions are occasionally met with, but are by no means common or dangerous. Lizards are pretty thick, and rattlesnakes are often seen, but are usually sluggish. In fact, the commonly accepted theory to the contrary, the poisonous reptiles of California do but little harm. The Californian would gladly take twenty times his present share of snakes, scorpions, tarantulas, centipedes and earthquakes rather than give up his present immunity from windstorms, hydrophobia and lightning.—Review of Van Dyke's "Southern California."

A Boy Who Made the Weather.

A Massachusetts newspaper tells the old story of Isaiah Thomas, who used to make almanacs. When he was preparing the one for 1780 one of his boys asked him what he should put opposite the "13th of July." Mr. Thomas, being engaged, replied: "Anything, anything." The boy, thus ordered, returned to the office and set "Rain, hail, and snow." The country was all amazement when the day arrived, for it actually rained, hailed, and snowed violently.—Chicago Tribune.

ITEMS OF GENERAL INTEREST.

—The aggregate population of Brooklyn and New York is nearly 2,300,000.

—The most wonderful mineral formation yet discovered is said to have been found near Colville, Nev. The ledge bears the same material from Damascus steel is manufactured.

—As amusements are scarce at Park City, Utah, it is no unusual thing for the entire population to turn out and go thirty miles to witness a wrestling-match or a horse-race.—*Denver Tribune.*

—England buys $19,252,884 out of the $20,805,824 worth of bacon we export; of hams, $2,454,980 worth out of the $3,231,509; nearly half of the $3,462,538 of pork and about one-third of our surplus lard.

—The honey crop of California will be immense this season. That of Los Angeles County will reach one thousand tons, and this amount will be exceeded by Ventura, San Diego and San Bernardino Counties.

—Mrs. Rose Merklhoffer, aged thirty-seven years, of Williamsburg, N. Y., gave birth to a male child which had whiskers fully half an inch in length on the sides of its face. The child only lived three hours.—*N. Y. Mail.*

—A new material for bonnets has been discovered in a sort of fungoid substance that looks like leather. The great merit of it is that when soaked in boiling water it becomes so soft that it can be converted into any shape.—*Troy Times.*

—The *Avalanche* heads a column of miscellaneous news items from three different States "Missarkalania." The *Avalanche* would feel mighty bad if some enterprising rival should start a column with the captivating heading of Tenkenalamissarkgeorflortexikalania.—*Nashville American.*

—In New York a scarlet label lettered in white must be put upon bottles containing preparations in which there are more than two grains of opium or morphine to the ounce. The name and residence of the person for whom the compound is prepared must be placed upon the label.—*N. Y. Sun.*

—A writer in the *British Medical Journal* advises people to be careful not to slice up a pineapple with the same knife they use in peeling it, as the rind contains an acrid organic substance which is likely to cause a swollen mouth and sore lips. In Cuba salt is used as an antidote for the poison of pineapple peel.

—Rev. J. H. Munro, of Philadelphia, says that the reason why so many clergymen go to Europe every summer is that the expenses of the trip are but little if any more than those covering a summer jaunt in this country; and that the great advantage is that when once across the water they are not likely to be called on "any little emergency."

—A gentleman once riding with a wealthy friend over his ample farm, came to the small farm of a humble neighbor. "That farm is mostly surrounded by mine, and I could have bought it some years ago," said the man of wealth, "but I would rather have such a neighbor than to have his farm." It would be difficult to determine which of the two farmers was most complimented by this remark.—*Western Rural.*

—A new law in New Jersey is aimed at the deceptive nursery agent. It provides that "any person selling fruit trees and fruit briers, who shall misrepresent the name or nature of said fruit trees or fruit briers, shall be guilty of a misdemeanor, and on conviction thereof shall be punished by a fine not exceeding one hundred dollars, or imprisonment in the county jail for a term not exceeding three months, or both, at the discretion of the court."

—Near Rockyhock in a yard, there appeared a few days since a veritable rainbow, the ends of which touched the ground at the distance of about ten feet from the house. It was about thirty feet long and presented all the characteristics of a bow. It staid near the house about five minutes and then receded across a field where it soon disappeared. A light rain was falling, but the sun came out a few minutes after the rainbow departed.—*Raleigh (N. C.) News.*

Trick of a French Smuggler.

It is a dog story, and this particular dog was assistant smuggler to a Frenchman who arrived from Liverpool a short time ago on the American line steamer British Princess. The customs officers, when they boarded the vessel, noticed the dog, a big Newfoundland, acting rather queerly, and they took it aboard the government's cutter and examined it. Just below the dog's neck in a pocket in the dog's breast they found a silk bag, which contained 200 diamonds, all the stones being of great value. The Frenchman tried to prevent the search, but without avail. The stones were sent to the treasury at Washington to await confiscation by the court.—Cor. Globe-Democrat.

New Treatment of the Whooping Cough.

Dr. W. T. Greene suggests an easily available improvement on the old plan of sending children on visits to gas works. His plan is to attach a piece of rubber tubing to a burner, the tubing being long enough to reach the floor. The gas is turned on just enough to make a perceptible odor, and the child is to inhale it for a few minutes at a time, as often as convenient.—Medical Press.

The Only Person Now Living.

Thomas Brown, aged 90, living away up in the Adirondacks, New York, raises his feeble voice to claim that he is the only person now living who has talked with George Washington. Thomas was a youngster of five summers at the time.—Chicago Times.

—During what portion of the day are bacteria or organic germs most numerously present in the atmosphere? Mons. Miquel, a member of the Paris Society of Public Medicine, has been trying to discover the true answer to this question, and he has found the number largest between six and nine o'clock in the morning, and smallest at about two o'clock in the afternoon. In the night he finds also a maximum at seven and a minimum at two. These results would indicate that the best times to open a house for ventilation would be two o'clock in the afternoon and two o'clock in the morning. This is well enough in summer, but the early ventilation will hardly be favored in winter.

HEAT WITHOUT FIRE.

How a Boston Professor Proposes to Make a Mighty Product.

Inventors and experimenters have been busy for several years in efforts to devise some practical method of producing heat by fire—by chemical action of friction. Such a device would be of great value for heating railroad cars especially for the reason that many frightful accidents from the burning of cars by the heating stoves which they now carry might be obviated. A contemporary says: "Of course if people could get along without fire there would be no conflagrations and no use for insurance companies. Nevertheless, underwriters will be interested in a recent invention which claims to generate heat without fire, and is said to have been successfully experimented with in Hookert Mills, N. H. The inventor is Prof. Webster Willis, of the Boston Institute of Technology, and he describes his 'friction heater' as simple in contruction, consisting only of an iron cylinder, one foot long and one foot in diameter, having a fixed plate of hardened iron in one end and a second plate attached to a revolving shaft, and pressed lightly or tightly against the fixed plate, as circumstances require. The cylinder is filled with water, the shaft revolves, and from the friction of the plates the water in an incredibly short time is heated, and by means of pipes can be carried to great distances for heating purposes. The machine has been in practical operation for some months, and it is demonstrated that a machine with thirty-six square inches of friction surface will heat a room of ten thousand cubic feet better and quicker than coal, wood, or steam can do it, and absolutely without expense, save the wear of the friction plates and the pittance for extra coal under the boiler. By this apparatus there is no danger from fire or explosion, and wherever there is waste power which can be utilized in this way the heat is obtained for almost nothing. It is claimed that a heater requiring two-horse power to run it will amply heat a room containing fifty thousand cubic feet, the heater costing one hundred dollars. Of course, time and further experiment will determine how useful the invention will prove practically; but there are those who now believe in it, and a company has been organized in Boston with a capital of half a million to manufacture and introduce the apparatus. For cotton mills, steam cars and a variety of other purposes the security against fire will be a great consideration in favor of the invention."—*Midland Industrial Gazette.*

SUSPICIOUS SENATORS.

Millionaire Legislators Seeking Protection From Cranks and Schemers.

It is curious how suspicious wealthy men become the moment they enter political life. When they remain in private life they are constantly on the lookout for chances for money-making. But bring them to Washington and put them into the House or Senate, and they get an idea that once there they are the target for every schemer in the country. One very wealthy man, who came here recently as a Senator, instituted a search as soon as he arrived for some man as private secretary who was especially familiar with all the cranks and schemers of all sorts, saying frankly to his friends that he wanted a man to protect him from schemers of this class. He had always heretofore proved himself quite competent to take care of his own business, and had been able to accumulate a magnificent fortune through the exercise of his own judgment, but the moment he arrived in Washington to take position as Senator he concluded he needed a protector.

Another Senator, who is a millionaire, gives very freely of his fortune, but is especially careful to ask those who become aware of it to keep the matter quiet. He recently told the writer of this correspondence that he had tried during the past year to keep his charities down to one thousand dollars per month.

"I would have succeeded in it, too," he said with apparent glee. "but for the fact that I gave ten thousand dollars extra in a direction that I did not count upon when I began my year's work in this line."

Another Senator who is reputed very wealthy is in a constant state of terror lest he be made the victim of some sort of speculation. He has been here a long time trying to screw his courage up to the point of making a certain real-estate investment in the city, but has not been able to make up his mind about it. Meantime others, with much less capital and not half the opportunity to get on the inside in these transactions, have invested in the very locality and thousands of dollars have been made. The very piece of ground over which he has been hesitating so long has been sold over and over again within the past few years and thousands of dollars realized by those who bought and sold it. Meantime he has driven past it frequently, hesitating in the fear that he was going to permit himself to be swindled in some way.—*Washington Cor. Chicago Journal.*

The Danger Removed.

Gamly and his friend are walking down the street:

Gamly (pointing to a building)—I can now pass that place without feeling anxious.

Friend—Why, have you paid the fellow who keeps there?

Gamly—No.

Friend—Then why are you so brave?

Gamly—Because he's dead.—*Arkansaw Traveler.*

—"Gentlemen of the jury, there is still another extenuating circumstance in favor of my client. He broke open a burglar proof safe, a masterpiece of German workmanship, valued by experts at two thousand five hundred marks, and this client of mine contented himself with the one hundred and twenty marks which he found inside and left the valuable safe to — paper."—*Fliegende Blatter.*

INDEX-TRIBUNE.

EDITOR

SONOMA, JULY 9, 1887.

Communications upon matters of local or general interest solicited.

Communications designed to call attention to any matter of limited or individual interest will not be inserted unless paid for as an advertisement.

The author's real name must accompany all communications, not necessarily for publication, but as a guarantee of good faith. This rule will not be deviated from

SIXTY THOUSAND STRONG.

The official announcement is made by the various transcontinental railroads, that 60,000 people are booked for California. They come from all parts of the United States. The greater number will arrive inside of the next three months. Most of these people are in search of homes; being attracted hither by our matchless climate, and the wonderful productiveness of our soil. The greater number of these home-seekers—like those that have been pouring into the Southern part of the State the past year—are well-to-do, and if induced to remain and make their homes on these shores will prove valuable acquisitions to our population.

These people will find their way to different parts of the State, but by far the greater number will be attracted to those sections which are reaching out for a boom. It therefore behooves Sonoma county to use every endeavor to attract this way her share of these home-seekers. It is true a move in that direction has already been made in Santa Rosa, Petaluma and Healdsburg by the organization of Boards of Trade, and if local jealousies are kept down, much may be accomplished by such means. As our town of Sonoma lies in the heart of one of the most beautiful, healthful and productive valleys of Sonoma county, she, too, ought to have her Board of Trade; and we would suggest that those gentlemen who have taken the task in hand of making a Sonoma Valley exhibit at the Mechanics' Fair in September, interest themselves in the matter of organizing a Board of Trade, to the end that one may be organized composed of the leading citizens of Sonoma Valley. If this is done, then some feasible plan may be adopted of drawing attention to this section, and creating a boom that will startle the Rip Van Winklians of Old Sonoma, who have so long slumbered in peace to the detriment of both town and valley.

OUR FORTHCOMING EXHIBIT.

There has been taken for the Sonoma Valley exhibit two hundred feet more space than was occupied by the whole county last year, so it behooves the members of the committees in each school district to bestir themselves and make collections, not only of money, but of produce and fruits of all kinds and also of any curios. We have taken the plunge and we must make our exhibit the most successful in the Fair, and this we can do if the matter be only thoroughly taken in hand. At once let it be understood now that the success of the undertaking lies with the people of our valley. A few individuals are working hard but all must join hands. More money is needed for expenses that naturally occur, such as show cases, care of exhibit, packing cases, glassware, etc. In reference to packing cases, Mr. Borman of Glen Ellen has set a good example, in not only subscribing to the fund, but in donating all the packing cases that he receives at his store.

It must be thoroughly understood that the space taken—600 square feet—is for the "Sonoma Valley Exhibit" alone. This includes Sonoma, Los Guilucos, Glen Ellen and Agua Caliente, but in no way includes the rest of the county. We see that Mr. Drummond has appointed as members of the General Committee of the Fair certain gentlemen in different parts of the county to look after the county exhibit, but this General Committee has in no way anything to do with the special exhibition of the products of our valley. Bills are coming in, money must be collected, so all ye who are interested in the prosperity of our valley should at once set to work and leave no stone unturned to make the Sonoma Valley Exhibit a success.

Safe and sure to regulate the bowels—Ayer's Cathartic Pills never fail to give satisfaction Recommended by eminent physicians.

WASHINGTON LETTER.

[From Our Regular Correspondent.]

WASHINGTON, June 27, 1887.

The present stringency in the money market will be afforded relief, particulary in New York and Chicago where it is most needed, by the action of Secretary Fairchild on Saturday. The Secretary telegraphed to all Assistant Treasurers ordering the payment of July interest, checks and coupons upon presentation. Most of the interest checks for this quarter have already been mailed to the persons to whom they are due. The remaining ones will be sent early in the week. The result of this step will put in circulation about $9,000,000. When the Secretary of the Treasury on a former occasion took similar action, his authority for so doing was questioned, but then as now, a national necessity must make the law. Secretary Fairchild, however, states that the interest was not anticipated on account of any financial apprehension by the Government, but as the checks were made out, the sending of them a few days before the first of July, would cause no inconvenience at the Department and would tend to reassure the public.

A party of Japanese officials and their interperter have arrived in Washington and will remain a month or two. Their purpose is to carefully study the workings of several branches of our Government, chiefly the subject of finance. The person of most importance in the party is a high officer in the financial department of the Japanese Government. They have taken a comfortable suite of apartments in a house on the heights of Georgetown.

The large pension paid to the blind beggar of Elmira, N. Y., turns out to be a bogus claim. Special agents of the pension office have already succeeded in tracking the parties who conspired to defraud the Government and in tracing the money so that the United States will lose but little of the original $13,000. The old blind man will also lose but little, as he probably saw but little of the money in the first place, but he may have to go to the penitentiary for having been the ignorant tool of the lot of sharpers who got the case through. Undoubtedly he will be more comfortable in the penitentiary than he was on the street begging with his dog.

There is a growing belief here that an extra session of Congress in Oct. is an assured fact. Speaker Carlisle is reported as having said that an extra session of Congress is a necessity. But it is not safe to put much faith in reported sayings of Speaker Carlisle, as he is generally very non-committal.

A rumor was current here on Saturday that Secretary Endicott had tendered his resignation on account of the battle flag episode, but at the White House the rumor was denied. Washington is always full of rumors even in the dullest season. Sometimes they mature into great events, but oftener fade into thin air.

The Secretaries of the local civil service boards, met the Civil Service Commissioners, according to agreement, in the city on the 24th inst. Several important questions were discussed, and several amendments to existing rules recommended. Of these the one suggesting the discontinuance of the forty-five year limitation, as to the age of clerks will be almost universally endorsed by the public. Most men and women are at the height of their capacities at the age of forty-five. It is to be hoped that this discussion will result in the beneficial result of separating the chaff from the wheat of civil service examinations. There is undoubtedly much good in the system, but it is not necessary to waste too much time in experiments, but to learn the lesson taught by experience as quickly as possible, and exclude such questions as the following immediately without further demonstrations of their folly. "A man bought twenty lead pencils for four cents, for one pencil he gave two cents, for three he gave a half cent, and for one he gave a quarter of a cent, what did he give for the others?" "Draw a straight line westward from the State of Maine to the Pacific Ocean and name the States, mountains, lakes and rivers, you would cross." Pencils are cheap, but they will never be cheap enough to demonstrate the utility of the first question, and the second is impracticable as it would involve the personal tour across the continent which it is natural to suppose an applicant for a position under civil service rules has not the means to undertake, or he would not be before the board for a $900 probationary place.

The President met Mrs. Cleveland at the depot on Saturday morning at nine o'clock. Mrs. Cleveland arrived in the best of health and spirits accompanied by Col. Lamont. She expressed herself enthusiastically over her visit to friends in New York. She probably will accompany the President to Philadelphia in September when he goes to take part in the constitutional convention celebration. The President has also been invited to the Indiana Agricultural State Fair, but has not yet decided to attend.

County Road Legislation.

[Colusa Sun.]

The hardest thing the California Legislature ever undertook to do is to make a passably good Road law. It looks as though every attempt only results in a worse law. No general law can be made to fit all sections, and in trying to make one fit all, the Legislature spoils it for all. We have suggested to several Legislatures that it would be well to make a general law for the laying out of roads and then provide that the Board of Supervisors of each county should make and publish road ordinances, which, when once established should be amended only after six month's notice of an intended amendment. The Legislature can give the Supervisors this power under the Constitution. Five Supervisors elected for their knowledge of county affairs, can judge as well of the needs of the county in that regard as can the average legislator, generally elected because of his unfitness for anything. A great step was made backward when the Legislature made the office of Roadmaster elective again. It is generally the case that some one runs for the office who is totally unfit for it, and who has no other interest in the matter than the drawing of big pay. The office is at the bottom of the ticket, and the voter becomes very careless by the time he gets down to it. The true plan is to make it a compulsory office, with a small salary, and let the Supervisors summon the man most interested in a given road to appear and show cause why he should not serve for a year as Roadmaster. There should be no road districts, but the Roadmaster should have a certain piece of road to look after; and the Board should allow him so much money for that road. Then if the man most interested in keeping that road in repair should have the office, the money would be made to do the greatest possible good.

COUNTY CULLINGS.

America is the name of a new Postoffice which has been established at Mark West Springs.

Gen. Joseph E. Johnston, of Southern Confederate fame, is visiting Judge W. W. Porter at Santa Rosa.

Decker & Jewett, who recently sold their farm in Los Guilucos Valley to the Sonoma County Land and Improvement Company for $75,000, hold a $60,000 mortgage on the same.

The Santa Rosa *Daily Mercury* is dead. After a sickly existence of one month it was forced to give up the ghost. It died for want of patronage, and its projector, A. J. Bledsoe, has gone and got married and emigrated to Humboldt county.

Peter Martin, who was assaulted and felled to the sidewalk with a blow of the fist by C. V. Tupper last week, in Santa Rosa, for insulting passing ladies in front of the Occidental Hotel, in that city, it is thought will recover. At first his injuries were supposed to be fatal.

The business men of Cloverdale are making a vigorous kick against the existing license ordinance, which imposes a county and township license on many kinds of business. A petition signed by nearly all the shopkeepers and farmers up that way has been presented to the Supervisors praying for a repeal of the odious license, on the ground that it is clearly double taxation.

The Hot Weather.

Of mid-summer has a weakening effect both upon the body and mind. You feel absolutely incapable of doing any work, and even light duties are performed languidly and unwillingly. This low state of the system causes even greater infirmity and gives an opportunity for serious disease to gain a foothold. In this condition the system is quick to respond to the reviving, quickening, and strengthening effects of Hood's Sarsaparilla, which purifies the blood, regulates the digestive organs and infuses fresh life and vigor into every portion of the body. People who have taken it write us, saying: "It puts new life right into me. It makes me young again." Reader, if you suffer from summer weakness, try Hood's Sarsaparilla. 100 Doses $1.

A Captain's Fortunate Discovery.

Capt. Coleman, schr Weymouth, plying between Atlantic City and N. Y., had been troubled with a cough so that he was unable to sleep, and was induced to try Dr. King's New Discovery for Consumption. It not only gave him instant relief, but allayed the extreme soreness in his breast. His children were similarly affected and a single dose had the same happy effect. Dr. King's New Discovery is now the standard remedy in the Coleman household and on board the schooner. Free Trial Bottels of this standed remedy at Wegner's Drug Store.

The new swimming baths at the Agua Caliente Warm Springs are completed and now open to the public. They are the largest and best appointed mineral baths in the State. The water of these springs are of delightful temperature for bathing and their curative properties are highly endorsed by our leading physicians.

A Conscientious Impressionist at Work.

I stumbled on the subject of "Impressionism" one day, as I sat chatting with Lefebyre in his studio in the Rue Labruyere. "Impressionism, indeed!" said the painter. "Let me tell you an anecdote. I was staying down at Trouville two or three years ago. One morning I rose early and went down to the beach. The weather was wretched. Overhead a gloomy sky—rain falling fast—and a keen northeaster whistling to complete your misery. I should have beat a retreat homeward without more ado had I not chanced to glance at the end of the jetty, where, to my huge surprise, I saw a painter, wrapped in rugs, hard at work upon a picture.

"Here's a conscientious man, thought I—bent on catching nature in an unlovely mood. And with no little admiration in my heart I walked quietly down the jetty and peeped over his shoulder. What do you think I saw, mon cher monsieur? The conscientious painter was one of the best known impressionists. The picture on his canvas—a study of the coast over the water at Havre—was garish with sunlight, while the sky was as blue as any you could see at Naples. After that I lost all belief in the sincerity of the impressionists."—N. O. Times-Democrat.

Best Horse Feed in the World.

The Californians carry their own forage with them. They have the best racehorse feed in the world. Their white oats are about the color of silver, the grain is fine and heavy, weighing forty-four pounds to the bushel, while the average weight is thirty-two pounds. Our oats average thirty-six pounds. The Californians don't feed timothy hay, but use a sort of wild grass with a heading very much like wild oats. It is cut green and cured, making better hay for horses than timothy.—Charles Hess in the Globe-Democrat.

Antiseptics Ordered by the King.

The King of Servia, according to the journals, has issued the following: "Whereas it is irrefutably proved by science that the so-called antiseptic treatment of wounds yields more beneficial results than all other methods, we are pleased to order that henceforward the said antiseptic plan of treatment be solely employed in all the hospitals of our kingdom, and that corrosive sublimate and iodoform be used until our further disposition.—Exchange.

Training Fleas for the Circus.

Who first discovered that the flea was susceptible to education and kind treatment is not known; but the fact remains that on their small heads there is a thinking cap capable of accomplishing great results. In the selection of fleas for training, however, the same care must be taken as with human beings, as the greatest difference is found in them. Some are exceedingly apt scholars, while others can never learn, and so it is that great numbers of fleas are experimented with before a troupe is accepted.

One of the first lessons taught the flea, is to control its jumping powers, for if its great leaps should be taken in the middle of a performance there would be a sudden ending of the circus. To insure against such a misfortune the student flea is first placed in a glass vial, and encouraged to jump as much as possible. Every leap here made brings the polished head of the flea against the glass, hurling the insect back, throwing it this way and that, until, after a long and sorry experience, and perhaps many headaches, it makes up its mind never to unfold its legs suddenly again. When it has proved this by refusing to jump in the open air, the first and most important lesson is complete, and it joins the troupe, and is daily harnessed and trained, until finally it is pronounced ready to go on the stage or in the ring.—St. Nicholas.

A Tunnel to Prince Edward's Isle.

By means of the proposed tunnel from the Canadian mainland to Prince Edward's isle, it is believed that the steam communication may be carried on all the year round, as is the case now in the Clyde, Severn and Thames system. The total distance from Cape Tormentine to Cape Traverse, the two terminal points, is eight and one-half miles, and between these two points are the straits of Northumberland. The plan is to run a tunnel composed of metal cylinders three-eights inches thick, fifteen feet in diameter, lined with concrete two and one-half feet thick, giving a clear passageway of ten feet, through which cars may be drawn by fireless engines, also to run piers out from the main land on the New Brunswick side, 10,000 feet, and from Prince Edward's side 4,000 feet. To reach the bottom of the straits, which at the ends of these piers is twenty feet below water level, a cylinder will run down a gradual incline. Ventilation of the whole will be secured by means of a shaft sunk about half way across the straits, at which point the water is ninety feet deep.—Chicago Herald.

No Landed Class in France.

There is no landed class in France, properly so called. There are 8,000,000 peasant proprietors. Entail and primogeniture are unknown, and a bit of land can be bought and sold as easily as a cow or a family bible. Notwithstanding 800,000 country folks have within the past five years quitted the green fields and homesteads of France in order to seek a living in the great towns.

BORN.

GRIFFITH—Near Sonoma, June 30th, to the wife of E. Griffith, a daughter.

MISCELLANEOUS.

HOOD'S COMPOUND EXTRACT OF SARSAPARILLA — TRADE MARK —

The importance of purifying the blood cannot be overestimated, for without pure blood you cannot enjoy good health.

At this season nearly every one needs a good medicine to purify, vitalize, and enrich the blood, and Hood's Sarsaparilla is worthy your confidence. It is peculiar in that it strengthens and builds up the system, creates an appetite, and tones the digestion, while it eradicates disease. Give it a trial.

Hood's Sarsaparilla is sold by all druggists. Prepared by C. I. Hood & Co., Lowell, Mass.

Go to the Occidental Hotel if you want good accommodations. +

The traveling public praise the Occidental Hotel, R. D. Moore proprietor. +

Our esteemed fellow citizen Gen. M. G. Vallejo passed his 80th milestone on Thursday last.

The installation of officers of Bear Flag Lodge, No. 97, K. of P., will take place on the 21st inst.

Jas. McMackin has leased his steam feed mills to parties in San Francisco as they will take possession next month.

Farmers desiring groceries and having the cash to pay for the same, can lay in a supply at Weyl's Cash Grocery as cheap as if purchased in the city. Come and be convinced*

Good pasturage on Norborm's ranch. Plenty of water. Terms per month: Horses, $1 50; cows, 75c; under 2 years, 50c. Inquire at this office, or of H. Aylmer, Norborm's ranch. *

No more pleasant holiday can be taken than a drive to Agua Caliente Springs where the best of lunches and dinners are served at reasonable rates, and a glorious swim may be enjoyed in one of the finest mineral baths in America. +

The Sonoma Public School will reopen Monday, July 25th, with the following teachers: Prof. Rosseau, principal; Miss Hope teacher in second room, Miss Ewing teacher in third room, Miss Harmon teacher in fourth room.

J. W. Logan, D. D. G. M. of Calistoga Lodge, No. 267, I. O. O. F., installed the officers-elect of Verdant Rebekah Degree Lodge, No. 99, last evening. Mr. Logan will instal the newly-elected officers of Sonoma Lodge, No. 28, I. O. O. F., to-night.

Catfish of very fine quality are being caught in great abundance at Embarcadero by our local fishermen. Vollmer's Hotel, which is located at the fishing grounds, affords good accommodations for sportsmen and in consequence Embarcadero is looming up.

Grading on the Donahue extension which is to connect the Sonoma Valley Railroad with the San Francisco and North Pacific at Pacheco is progressing rapidly. Six miles of the road-bed is already graded and and ties are on the ground awaiting track-laying.

A number of our young men who are natives of this coast will hold a meeting in Odd Fellows' Hall tomorrow afternoon at 2 o'clock, for the purpose of organizing a Parlor of the Native Sons of the Golden West. It is expected that the charter list will contain at least twenty-names.

A party of merry campers composed of Mr. and Mrs. Charles Ward, Mrs. Trudgen, Miss Belle Neil, Miss S. Shaw, Messrs. Toothaker and R. Wilson left Thursday morning for Lake county, in a four-horse Concord coach. The party will be absent several weeks and no doubt will have a jolly time as they were well provided with everything that makes camp life pleasant.

The Fourth of July passed off very peaceable in this place and nothing occurred to mar the pleasures of the day. Not a drunken man was to be seen on the streets, and the pugilistically inclined, who generally bob up to the surface in every community on the glorious Fourth, were on their good behavior and in consequence our sporting editor failed to scare up a fighting item.

The financial statement of the Fourth of July Committee will appear in our next issue. It will show the receipts of money as subscribed by each individual; also, amount of cash expended and for what purpose, and balance remaining on hand. There can be no denying the fact that the committee having the celebration of the Fourth in hand has managed the affair in a most successful, business-like and methodical manner.

District Deputy E. J. Mullen of this place, accompanied by several members of Bear Flag Lodge, No. 97, K. of P., visited Petaluma Lodge No. 100, Friday evening of last week, and installed the newly elected officers of that Lodge. After the installation ceremonies, Mr. Mullen and party were invited to the American Hotel and were right royally banqueted by their brethren of Petaluma.

On Saturday evening last as the train pulled into Vineyard station, a horse attached to a phaeton in which was seated Mrs. George Spencer and her little baby girl, became frightened and plunged madly forward. Mrs. A. J. Haubert who was standing on the platform, with rare presence of mind sprang forward and seized the animal by the bit as the buggy was about to overturn, and by forcing the horse backward righted the vehicle just in time to prevent what might have been a serious if not fatal accident.

Severely Burned by Powder.

The Fourth of July, was singularly free from accidents, considering the number of people assembled in Sonoma, no mishaps worthy of note having occurred in the town. At Rhine Farm, the home of Mr. Gundlach, however, quite a serious accident occurred. Carl Bundschn, a grand-son of Mr. Gundlach's, was enjoying himself with explosives, as boys are wont to do on the Fourth. He had prepared to ignite a quantity of powder on the ground, and by some means he tripped and fell with his face directly over it, the powder exploding at the same instant. His eyebrows, eye-lashes and the skin from his forehead and cheeks were burned off. The boy's eyes were also somewhat injured, but Dr. Davis who was called upon to attend the sufferer, anticipates no serious results either to the eyesight or otherwise. Master Bundschn's face and eyes were dressed and he left for his home in San Francisco by the train on the afternoon of the 4th.

Lost His Finger.

On Sunday evening last, Robert H. Murphy, the thirteen-year-old son of A. J. Murphy, the barber, while cutting mulberry leaves in Prof. Jos. Newmans' cocoonery, at this place, got his left hand entangled in the cutting machine, and quicker than a flash the sharp knives of the cutter completely severed the middle finger and left the index finger hanging by a mere shred of flesh. Dr. Lawrence, who attended the injured boy, expresses the hope of saving the latter member. Mr. Murphy's family appears to be extremely unfortunate in meeting with accidents of this nature. It is only a few months ago that the injured boy had one of his hands badly crushed while handling basalt blocks; and a few days later another boy had one of his fingers almost cut off with an axe. It is an old saying that "accidents run in families," which appears to be verified in Mr. Murphy's case.

Married in Haste.

[Petaluma Argus.]

Less than a year ago one William J. Blake, a smooth talker, well dressed and a dead beat of the first order, made his appearance in Petaluma, and before many weeks were passed he married a respectable widow lady. It soon transpired that he had other wives in other places—in short he was very extensively married. Of course he soon deserted his Petaluma wife, after getting all the ready money he could. His Petaluma wife sued for a divorce in San Francisco on the grounds of bigamy and desertion, which was granted on Wednesday last. "Marry in haste and repent at leisure," observed Judge Gibson as he signed the decree.

Young Mens' Institute.

A. B. Maguire, District Deputy and Grand Marshal of the Young Mens' Institute, accompanied by a delegation from San Francisco, will visit Sonoma to-morrow for the purpose of organizing a branch Institute here. The objects of this organization are mutual aid and benevolence; the moral, intellectual and social improvement of its members. In order that these objects may be successfully attained, its efforts will be directed towards procuring libraries, halls and reading rooms, where young men may meet in social intercourse and create an interest in each others' welfare.

The Quail Nuisance.

On Thursday last the Supervisors of Napa county, in accordance with a recent Act of the Legislature, passed an ordinance making it lawful to kill quail from the 1st of August to the 1st of March. Heretofore these birds could not be killed until October, but owing to their destructive raids on the vineyards the Supervisors wisely made this change. A similar ordinance ought to be passed by the Sonoma Supervisors.

An Important Element.

Of the success of Hood's Sarsaparilla is the fact that every purchaser receives a fair equivalent for his money. The familiar headline "100 Doses One Dollar," stolen by imitators, is original with and true only of Hood's Sarsaparilla. This can easily be proven by any one who desires to test the matter. For real economy, buy only Hood's Sarsaparilla. Sold by all druggists.

PERSONAL AND SOCIAL.

Mr. and Mrs. E. J. Mullin and Miss M. Graham left on Thursday morning on a two-week's camping and fishing trip on the coast.

Mr. George Volz and Miss Annie Anthus, are spending a week at Bella Vista, the residence of Mr. and Mrs. A. J. Haubert.

Mr. Fred. Duhring, a student at the State University at Berkeley, is spending his vacation among his relatives and friends in Sonoma. He will extend his visit two months or more.

Its concentrated curative power makes Ayer's Sarsaparilla the best blood purifier.

THE FOURTH IN SONOMA.

How Her Citizens Observed the Day --The Celebration a Success.

The one hundredth and eleventh anniversary of our National independence was appropriately celebrated here by a parade, literary exercises, a grand ball and a magnificent banquet to Sonoma's invited guests, the Mexican War Veterans and the survivors of the Bear Flag party.

At an early hour in the day people commenced to pour in from the surrounding country and by 11 A. M. almost the entire population of Sonoma Valley were in town, and these, with visitors that came from adjacent cities and from San Francisco, gave Sonoma an animated appearance.

All the business houses and many of the private residences were handsomely and profusely decorated with flags and evergreens, and the stars and stripes floated from every flagstaff.

The Pavilion presented a handsome appearance, being provided with an arbor of evergreens twelve feet wide which extended completely around the building. The interior presented a beautiful sight, being festooned with evergreens and decorated with shields, flags, streamers and Chinese lanterns. The Decorating Committee, Mrs. Wm. Brown and Mrs. Geo. A. Batchelder, received many compliments through the day for their skill and taste as decorators.

The various committees reported promptly at the City Pavilion at an early hour, and received the old soldiers of the Mexican War from adjacent places as they came in.

At 11:30 the train bearing the Associated Veterans of the Mexican War arrived, and they were received with cheers. After the Veterans had disembarked a line was formed under the direction of Grand Marshal McGill assisted by his aids, Capt. P. N. Stofen and F. Ehrlich. The column, preceded by the Sonoma Brass Band of eighteen pieces, then marched around the Plaza to the Bear Flag pole. The Veterans presented a fine appearance in their uniforms, and their old battle flags and banner flying to the breeze brought vividly to the mind the hardships and peril which many of these scarred veterans had passed through in fighting the battles of their country.

Arriving at the old Bear Flag pole the column halted, and Hon Robert Howe, President of the Day, delivered an address of welcome, which was responded to by Capt. Samuel Deal, President of the Associated Veterans of the Mexican War.

The Bear Flag, which had been raised early in the day by Calvin Griffith, John York and Harvey Porterfield, survivors of the Bear Flag party, who were present and took part in raising the flag 41 years ago, was then hauled down and the stars and stripes run up. This interesting ceremony concluded, three rousing cheers were given for the old flag.

The line was again formed and the Veterans escorted to Weyl's Hall, which had been generously placed at their disposal by Mr. H. Weyl. Here a banquet awaited them which had been prepared by the Refreshment Committee, composed of Mrs. H. H. Granice, Mrs. Capt. P. N. Stofen, Mrs. C. Goodman, Miss Etta Raschen and Miss Annie Church. The tables, four in number, extending the entire length of the hall comfortably seated the 150 guests present, presented a beautiful appearance. The refreshments had been contributed by the patriotic ladies of Sonoma Valley, and were much appreciated by the Veterans. Capt. J. H. Drummond, Henry Winkle, J. Gundlach, J. Dresel and G. P. Sears sent the choicest wines from their cellars, some of the white being 22 years old. These wines were pronounced by a number of the guests the finest they had ever tasted.

The banquet being over, at 1:30 the literary exercises were held at the Pavilion, which, together with the space outside, was literally packed with listeners.

Promptly at the appointed time the assemblage was called to order by Hon. Robert Howe, who in his usual pleasant manner delivered the introductory address. Rev. E. H. King then offered prayer and was succeeded by Dr. H. H. Davis, who read the Declaration of Independence. Miss Emma Hope followed with a recitation, "Many in One," which was ably rendered and loudly applauded. Prof. Strahan then sang the "Star Spangled Banner," the audience joining in the chorus. Robert Poppe followed with a carefully prepared sketch on the "Character and Consequences of the Bear Flag Movement." This address was by far one of the most interesting features of the exercises, and was listened to with marked attention by the hundreds present. A recitation by Geo. H. Badger, entitled "Mustered Out," was then rendered, after which Hon. Chancellor Hartson of Napa, delivered an eloquent oration, treating the various topics he touched upon with a masterly skill.

At the conclusion of the literary exercises the Veterans retired to Weyl's Hall, which had been especially set apart as their headquarters, where they were agreeably entertained by the Reception and Refreshment Committees until the departure of the train which bore them homeward.

A grand ball at the Pavilion in the evening wound up one of the most successful celebrations that has ever taken place in Sonoma county, and it will long be remembered with pleasure by those who participated.

A Pleasant Social.

On Friday evening of last week Valley of the Moon Chapter, No. 85., O. E. S., gave a very successful invitation social at Weyl's Hall. Quite an attractive program was presented, after which dancing was indulged in until a late hour. Delicious ice cream was served during the evening and the occasion was heartly enjoyed by a large number of ladies and gentlemen. Among those present were: Mr. and Mrs. Akers, Capt. and Mrs. Cutter, Mr. Mr. and Mrs. O. B. Shaw, Rev. and Mrs. Wikoff, Mr. and Mrs. McHarvey, Mr. and Mrs. Weems, Mr. and Mrs. Ward, Mr. and Mrs. Goodman, Capt. and Mrs. Stofen, Mr. and Mrs. McIntyre, Mr. and Mrs. G. Harris, Mr. and Mrs. G. Spencer, Mr. and Mrs. H. Granice, Mrs. A. Pauli, Mrs. S. H. Shaw, Mrs. Sparks, Mrs. Tobin, Mrs. C. McHarvey, Mrs. Cassabohm. The Misses O. Ehrlich, K. Green, H. Ehrlich, O. Copeland, A. Pemberton, S. Shaw, A. Weyl, G. Shaw, J. Tobin, S. Cheney, E. McIntyre, A. Cheney, M. Goodman, W. Akers. Dr. H. H. Davis, R. Poppe, C. Wise, J. J. Wystyrk, C. Ringstrom, O. Ehrlich, M. Donahue, A. McLaughlin, Fred. Ehrlich, C. Tarrent, F. Ehrlich, Mr. Thomas, and others.

Glen Ellen Notes.

Religious services by the Rev. Warren of San Francisco were held at the camp ground last Sunday.

John Stately left for San Francisco last Saturday to celebrate the 4th. The patriotism of John demands a first class time on that day.

Roadmaster McGill has completed his labors on the roads in the Nun Canyon. We have not inspected the job but know that Mac only does first-class work.

The Sonoma County Land and Improvement Co. are building a wagon road the entire length of the Decker & Jewett place. James A. Box is superintending the job.

Our smiling and good natured friend William Sobbe has with the aid of a razor and strap removed some of his facial adornments and now presents a sort of dudefied and dignified appearance.

A large number of the friends of A. W. Justi of this place attended his funeral last Saturday at Sonoma. Being born and raised here and a young man of excellent character his sudden demise caused great sorrow in the community.

In Brief, and to the Point.

Dyspepsia is dreadful. Disordered liver is misery. Indigestion is a foe to good nature.

The human digestion apparatus is one of the most complicated and wonderful things in existence. It is easily put out of order. Greasy food, tough food, sloppy food, bad cookery, mental worry, late hours, irregular habits, and many other things which ought not to be, have made the American people a nation of dyspeptics.

But Green's August Flower has done a wonderful work in reforming this sad business and making the American people so healthy that they can enjoy their meals and be happy.

Remember:—No happiness without health. But Green's August Flower brings health and happiness to the dyspeptic. Ask your druggist for a bottle. Seventy-five cents.

The Occidental Hotel, under the management of Mr. R. D. Moore and his estimable wife, is growing in popularity every day. +

Weyl's Cash Grocery Store is selling groceries at the very lowest rates. Call and be convinced. +

All Conversation and even whispers heard distinctly. We refer to those using them. Send for illustrated book with testimonials, free. Address, F. HISCOX, 853 Broadway, N. Y. Mention this paper.

Trouble Ahead.

When the appetite fails, and sleep grows restless and unrefreshing, there is trouble ahead. The digestive organs, when healthy, crave food, the nervous system, when vigorous and tranquil, gives its possessor no uneasiness at night. A tonic, to be effective, should not be a mere appetiser, nor are the nerves to be soothed by the unaided action of a sedative or a narcotic. What is required is a medicine which invigorates the stomach, and promotes assimilation of food by the system, by which means the nervous system, as well as other parts of the physical organism, are strengthened. These are the effects of Hostetter's Stomach Bitters, a medicine whose reputation is founded firmly in public confidence, and which physicians commend for its tonic, anti-bilious and other properties. It is used with the best results in fever and ague, rheumatism, kidney and uterine weakness and other maladies.

When Baby was sick, we gave her Castoria,
When she was a Child, she cried for Castoria,
When she became Miss, she clung to Castoria,
When she had Children, she gave them Castoria.

This powder never varies. A marvel of purity strength and wholesomeness. More economical than the ordinary kinds, and cannot be sold in competition with the multitude of low test, short weight alum or phosphate powders. SOLD ONLY IN CANS. ROYAL BAKING POWDER CO., 106 Wall St., N. Y.

For Toilet Use.

Ayer's Hair Vigor keeps the hair soft and pliant, imparts to it the lustre and freshness of youth, causes it to grow luxuriantly, eradicates Dandruff, cures all scalp diseases, and is the most cleanly of all hair preparations.

AYER'S Hair Vigor has given me perfect satisfaction. I was nearly bald for six years, during which time I used many hair preparations, but without success. Indeed, what little hair I had was growing thinner, until I tried Ayer's Hair Vigor. I used two bottles of the Vigor, and my head is now well covered with a new growth of hair. —Judson B. Chapel, Peabody, Mass.

HAIR that has become weak, gray, and faded, may have new life and color restored to it by the use of Ayer's Hair Vigor. "My hair was thin, faded, and dry, and fell out in large quantities. Ayer's Hair Vigor stopped the falling, and restored my hair to its original color. As a dressing for the hair, this preparation has no equal.—Mary N. Hammond, Stillwater, Minn.

VIGOR, youth, and beauty, in the appearance of the hair, may be preserved for an indefinite period by the use of Ayer's Hair Vigor. "A disease of the scalp caused my hair to become harsh and dry, and to fall out freely. Nothing I tried seemed to do me any good until I commenced using Ayer's Hair Vigor. Three bottles of this preparation restored my hair to a healthy condition, and it is now soft and pliant. My scalp is cured, and it is also free from dandruff.—Mrs. E. R. Foss, Milwaukee, Wis.

Ayer's Hair Vigor,

Sold by Druggists and Perfumers.

PERFECT SAFETY, prompt action, and wonderful curative properties, easily place Ayer's Pills at the head of the list of popular remedies for Sick and Nervous Headaches, Constipation, and all ailments originating in a disordered Liver.

I have been a great sufferer from Headache, and Ayer's Cathartic Pills are the only medicine that has ever given me relief. One dose of these Pills will quickly move my bowels, and free my head from pain.—William L. Page, Richmond, Va. ††

SONOMA INDEX - TRIBUNE.
SATURDAY, JULY 9, 1887.

Booming Early, Booming Late.

Toll us not in mournful numbers
While the town is full of gloom,
For the man's a crank who slumbers
In these bursting days of boom.

Life is real, life is earnest,
And the grave is not its goal;
Every dollar that thou turnest
Helps to make the old town roll.

But enjoyment, and not sorrow,
Is our destined end or way;
If you have no money, borrow—
Buy a corner lot each day.

Lives of great men all remind us
We can win immortal fame;
Let us leave the chumps behind us,
And we we'll get there just the same.

In this world's broad field of battle,
In the bivouac of life,
Let us make our dry bones rattle—
Buy a corner lot for wife!

Let us then be up and doing,
With a heart for any fate;
Still achieving, still pursuing,
Booming early, booming late.
—Portland, Or., Telegram.

MURDERED BY THE INDIANS.

An Incident of the Early History of California.

[Shasta Courier.]

Last week, at the instance of Uncle Dick Johnson, the remains of Samuel Burney, for whom this lovely little valley and the mountain to the south of it were named, were removed from the ranch of Charles A. Teel to the plot selected by the people of this place as the Burney Cemetery. Samuel Burney was murdered by the Indians March 11, 1859, while sitting alone in his log cabin writing to his people, who lived in some more civilized part of this State. It is said the last words he wrote were: "Perhaps I shall be murdered before the snow melts." While writing the murderous redskins were upon him and crushed his skull with a hatchet. The next day Uncle Dick Johnson found the body where it had been concealed. He dug a grave, with no other implement than a sharpened stick, and rolling the body of the unfortunate young pioneer in his coat, he buried it. It is believed that Gun Smith, an old Indian living here now, in peace, on the bounty of the whites, and Shave Head, an ex-chief of Hat Creek, did the killing. Samuel Burney was a young man of more than ordinary pluck and ability, and determined to brave the dangers and hardships of California frontier life to settle the country. After a lapse of more than a quarter of a century his merits are recognized and the people of Burney Valley, by subscription, which has already been liberally signed, are to erect a suitable monument over all that is mortal of Samuel Burney.

We Tell You Plainly

That Simmons Liver Regulator will rid you of Dyspepsia, Headache Constipation and Billiousness. It will break up chills and fever and prevent their return, and is a complete antidote for all malarial poison—yet entirely free from quinine or calomel. Try it, and you will be astonished at the good results of the genuine Simmons Liver Regulator, prepared by J. H. Zeilin & Co.

The turkey is one of the best-paying fowls the farmer can keep when the surroundings are favorable. Throughout the entire year turkeys are saleable in lesser quantities, for the city hotels and restaurants chiefly, and there is no common poultry, perhaps, that will average the year through better or steadier in price than these fowls.

Renews Her Youth.

Mrs. Phœbe Chesly, Patterson, Clay Co., Iowa, tells the following remarkable story, the truth of which is vouched for by the residents of the town: "I am 73 years old, have been troubled with kidney complaint and lameness for many years; could not dress myself without help. Now I am free from all pain and soreness, and am able to do all my own housework. I owe my thanks to Electric Bitters for having renewed my youth, and removed completely all disease and pain." Try a bottle, only 50c. at Wegner's Drug Store.

Bucklen's Arnica Salve.

The best salve in the world for Cuts, Bruises, Sores, Ulcers, Salt Rheum, Fever Sores, Tetters, Chapped Hands, Chilblains, Corns and all Skins Eruptions, and positively cures Piles or no pay required. It is guaranteed to give perfect satisfaction, or money refunded. Price 25 cents per box. For sale by E. Wegner.

A story comes from Washington to the effect that owning to the battle-flag episode an attempt will be made to divide the Grand Army of the Republic and start an organization of Democratic ex-soldiers.

Give Them A Chance!

That is to say, your lungs. Also all your breathing machinery. Very wonderful machinery it is. Not only the larger air-passages, but the thousands of little tubes and cavities leading from them.

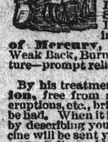
When these are clogged and choked with matter which ought not to be there, your lungs cannot half do the work. And what they do, they cannot do well.

Call it cold, cough, croup, pneumonia, catarrh, consumption or any of the family of throat and nose and head and lung obstructions, all are bad. All ought to be got rid of. There is just one sure way to get rid of them. That is to take Boschee's German Syrup, which any druggist will sell you at 75 cents a bottle. Even if everything else has failed you, you may depend upon this for certain.

A Terrible Surgical Operation

A FATAL MISTAKE.

THE *Cleveland* (Ohio) *Press*, of February 23d, 1883, published an account of a fatal surgical operation which caused a great commotion among medical men throughout the whole country, Dr. Thayer, the most eminent surgeon in Cleveland, pronouncing it scandalous. It appears that a Mrs. King had been suffering for many years from some disease of the stomach, which had resisted the treatment of all the physicians in attendance. The disease commenced with a slight derangement of the digestion, with a poor appetite, followed by a peculiar indescribable distress in the stomach, a feeling that has been described as a faint "all gone" sensation, a sticky slime collecting about the teeth, causing a disagreeable taste. This sensation was not removed by food, but, on the contrary, it was increased. After a while the hands and feet became cold and sticky—a cold perspiration. There was a constant tired and languid feeling. Then followed a dreadful nervousness, with gloomy forebodings. Finally the patient was unable to retain any food whatever, and there was constant pain in the abdomen. All prescribed remedies failing to give relief, a consultation was held, when it was decided that the patient had a cancer in the stomach, and in order to save the patient's life an operation was justifiable. Accordingly, on the 22d of February, 1883, the operation was performed by Dr. Vance in the presence of Dr. Tuckerman, Dr. Perrier, Dr. Arms, Dr. Gordon, Dr. Capner, and Dr. Halliwell of the Police Board. The operation consisted in laying open the cavity of the abdomen and exposing the stomach and bowels. When this had been done an examination of the organs was made, but to the horror and dismay of the doctors there was no cancer to be found. The patient did not have a cancer. When too late the medical men discovered that they had made a terrible mistake; but they sewed the parts together and dressed the wound that they had made, but the poor woman sank from exhaustion and died in a few hours. How sad it must be for the husband of this poor woman to know that his wife died from the effects of a surgical operation that ought never to have been performed. If this woman had taken the proper remedy for Dyspepsia and Nervous Prostration (for this was what the disease really was), she would have been living to-day. SHAKER EXTRACT OF ROOTS, or SEIGEL'S CURATIVE SYRUP, a remedy made expressly for Dyspepsia or Indigestion, has restored many such cases to perfect health after all other kinds of treatment have failed. The evidence of its efficacy in curing this class of cases is too voluminous to be published here; but those who read the published evidence in favor of this dyspeptic remedy do not question its convincing nature, and the article has an extensive sale.



MEN OF ANY AGE HAVING any Nervous or Sexual Disease, Unnatural Loss, Diabetes, Bright's Disease,

LOST MANHOOD,

Nervous Debility, Spermatorrhœa, Seminal Losses, Sexual Decay, Failing Memory, Weak Eyes, Lack of Energy, also Blood and Skin Diseases, Syphilis, Eruptions, Hair Falling, Bone Pains, Swellings, Sore Throat, Ulcers, Effects of Mercury, Kidneys and Bladder Troubles, Weak Back, Burning Urine, Gonorrhœa, Gleet, Stricture—prompt relief and cure for life.

LADIES,

By his treatment a pure, lovely complexion, free from sallowness, freckles, blackheads, eruptions, etc., brilliant eyes and perfect health, can be had. When it is inconvenient to come to the city, by describing your disease, on receipt of $5, medicine will be sent you free from gaze, to suit the case.

H. H. GRANICE. HENRY RASCHEN.

RASCHEN & GRANICE,

REAL ESTATE BROKERS,

OFFICE IN

Union Hall Building, SONOMA

OFFER FOR SALE SOME OF THE FINEST PROPERTIES IN SONOMA VALLEY.

ELEGANT HOMES, SMALL FARMS AND VINEYARDS.

☞ Now is the Time to Buy as Property will Never Again be so Cheap in Sonoma Valley. ☜

FOLLOWING ARE A FEW OF THE BARGAINS WHICH WE OFFER:

$12,000. SIXTY-FIVE ACRES; 1 mile W. of Sonoma, on the creek; good house with modern conveniences; barn, wine cellar, orchard, etc. A charming home.

$20,000. FORTY-TWO ACRES; 1½ miles S. E. of Sonoma; fine soil; nearly all in bearing vines and fruit trees; fine 8-room cottage; 2 wine cellars; full set of cooperage for 60,000 gallons; barn, windmill and everything complete.

$7500. ABOUT FIFTY ACRES, ON SONOMA Creek, 2 miles W. of Sonoma; first-rate Orchard and Vineyard land; good dwelling house, barn, etc. This is a bargain.

$8,500. FORTY-TWO AND A HALF acres; 4 miles S. of Sonoma; 20 acres in bearing vines; 10 acres in young fruit trees; fine dwelling, barn, outhouses, etc; ½ mile from depot; land well drained.

$42,500. THE UNDIVIDED ½ of one of the finest farms in Sonoma Valley, consisting of 370 acres; 144 acres in vineyard, 140 acres orchard, all of best varieties, and 66 acres of the best of farming land; large, modern buildings; windmills, horses, harness, buggies, wagons and farming utensils in abundance; also; one of the best fruit-driers in the country; one-half cash, balance on time at a low rate of interest; a fine investment; will pay 15 to 20 per cent on the investment; Sonoma Creek runs through the center of the place and affords one of the finest fishing privileges in the State. The farm contains the following fruit trees; Apricots, 1600, Cherries 1000, Pears 3200, Plums 1600, Peaches 4800, Apples 1250, quinces 4000; figs, walnuts, olives, etc.

$8,500. FIFTY-FIVE ACRES IN VINEyard; W. side Sonoma Creek, five miles from Sonoma. A good investment.

$5,200. SEVENTEEN ACRES, CHOICE land; ½ mile E. of Sonoma; 1,000 choice bearing fruit trees; vineyard 3 and 4 years old. This place is cheap.

$4,000. FORTY ACRES, FOUR MILES from Sonoma on Santa Rosa road; good house, orchard, etc. This is a nice place and cheap for the money.

$5,000. TWENTY ACRES; ¾ MILE E. of Sonoma; all in bearing vines and fruit trees; house, barn, outbuildings, wagons, buggy, cows, etc For a small farm this can't be beat

$14,000. THIRTY-FIVE ACRES; TWO and one-half miles E. of Sonoma; 32 acres in vineyard, 25 acres in 4-year-old Zinfandels; good house, barn, orchard, etc.

$6,000. THIRTY ACRES; BEST CREEK bottom land, 3 miles S. of Sonoma; with all crops and farming tools; good, new cottage; barn, outbuildings; 1,200 fruit trees, most apples and peaches. This land will produce fine corn, garden truck, alfalfa or anything else that grows in this latitude. A rare bargain.

$18,000. FORTY-TWO AND ONE-HALF acres; 1 mile E. of Sonoma; deep, sandy loam; fine modern dwelling, windmill, barn, farming implements, etc.; about 13,000 grape vines; fine orchard, etc. This is not only one of the most charming and convenient homes in the State, but will pay good interest on double the price asked.

MISCELLANEOUS.

TRIED IN THE CRUCIBLE.

S.S.S.

About twenty years ago I discovered a little sore on my cheek, and the doctors pronounced it cancer. I have tried a number of physicians, but without receiving any permanent benefit. Among the number were one or two specialists. The medicine they applied was like fire to the sore, causing intense pain. I saw a statement in the papers telling what S. S. S. had done for others similarly afflicted. I procured some at once. Before I had used the second bottle the neighbors could notice that my cancer was healing up. My general health had been bad for two or three years—I had a hacking cough and spit blood continually. I had a severe pain in my breast. After taking six bottles of S. S. S. my cough left me and I grew stouter than I had been for several years. My cancer has healed over all but a little spot about the size of a half dime, and it is rapidly disappearing. I would advise every one with cancer to give S. S. S. a fair trial.

DR. ROGERS

HEART TONIC

IT NEVER FAILS TO GIVE RELIEF. THOUsands testify to its wonderful cures. If you are wise, you will try it at once, if afflicted with heart trouble of any kind. It is not a new remedy, but its value has been thoroughly proven.

J. J. MACK & CO.,

WHOLESALE DRUGGISTS,

SAN FRANCISCO, CAL.

Sole Agents for the Coast.

BILIOUSNESS

"I unhesitatingly add my testimony to the great benefits to be derived from Simmons Liver Regulator. I was afflicted for several years with disordered Liver, which resulted in a severe attack of Jaundice. I had good medical attendance, but it failed to restore me to the enjoyment of my former health. I then tried the most renowned physicians of Louisville, Ky., but all to no purpose, whereupon I was induced to try Simmons Liver Regulator. I found immediate benefit from its use, and it ultimately restored me to the full enjoyment of health."—A. H. SHIRLEY, Richmond, Ky....."I most cheerfully recommend it to all who suffer from Bilious Attacks or any disease caused by a disarranged state of the Liver."....W. R. BERNARD, Kansas City, Mo.

GOOD TIDINGS.

"DR. SMITH:—Your truly wonderful Caloric Vita Oil has performed for me the most remarkable and speedy cure of rheumatism on record. I do not hesitate to recommend it as the greatest pain reliever in existence.

"F. B. GILLUM.

"No. 534 Fifteenth street, Oakland, Cal."

"It cured my neuralgia in a few hours, when I had suffered night after night with it and tried everything. "A LOCAL PREACHER.

"San Francisco, Cal."

"I feel like sounding its praise on the housetops. "HON. CHAS. A. SUMNER."

WON'T BLISTER.—Caloric Vita Oil takes the place of all pain killing lotions or liniments, poultices or blisters, and while its penetrating, heating, healing and vital action is tenfold more powerful than either, *it will not chafe or blister.*

Dr. J. Winchester, Columbia, Cal., says: "Have used Vita Oil with the most beneficial results; can endorse without hesitation your claim. *As a family remedy for the relief of pain it has no equal in the world.* In our household it has become indispensable."

"With a thankful heart I acknowledge the great merit of Dr. Smith's Caloric Vita Oil. I had suffered over 30 years with bronchitis and was seriously threatened with lung disease. I had tried all remedies and all climates with occasional temporary relief, but in vain. The use of two small bottles made me a sound man.

"A BANK OFFICER."

A prominent druggist in San Francisco:—"We hazard nothing in saying it is the best pain curer and healing remedy ever used or known. It acts quickly, promptly and certainly in relieving pain. Hundreds of sufferers have been relieved by it, to the wonder of thousands of their friends. Its sales have doubled nearly every month."

"It will do the heaviest work of any medicine I ever handled, and quick, too."

A PHYSICIAN.

TUTT'S PILLS

25 YEARS IN USE.

The Greatest Medical Triumph of the Age!
